SECTION J-J

SECTION G-G

SECTION K-K

NOTES

- The location of the horizontal splice line is dependent on the sign panel manufacturer for signs greater than 1524 mm in depth. Mounting bolts and clamps are required on each of the horizontal splice line at each support beam.
- Position sign panel so that mounting beams will clear truss connections and arm to post joints. Where interference cannot be avoided, 13 mm Ø holes to pass the 10 mm Ø U-bolts may be drilled through mast arm angles or truss connection members as necessary.
- Torque stainless steel sign panel mounting bolts to 12 Nm.
- 300 mm for Type C-1 and C-2. Others, 102 mm.
- A stop plate is required at each mounting beam under sign panel.
